Fitted Garages

If you enjoy  
working on  
**classic cars**

# An enthusiasts sanctuary

**A simple and beautiful notion of owning a classic car is that you can take something run down and tired, and inject new life into a timeless piece of engineering. This transformation is made more enjoyable when working in a beautifully organised workshop.**

We start our classic car workshop with every enthusiasts must have, a 1200mm tool storage cabinet and top box. With a combination of drawer depths and double lock mechanism, these units offer you ultimate flexibility and security.

Rebuilding and enhancing cars and their engines can often be a dirty task. To combat this we have integrated a towel and glove dispenser above a sink with stainless steel back panel and waste bin. This wash up area ensures you enjoy a clean and safe working environment at all times. To house your dirty overalls and safety wear we have also included a tall cabinet with fitted coat rail.

The workshops cabinetry run is continued with high-level storage cabinets and a louvre back panel system to ensure you have optimum storage space for small components, hand tools, aerosols and lubricants. For heavyweight engine work we have incorporated a heavy duty workbench available with different worktops dependent upon your needs. To complete our classic car enthusiasts dream garage, we have a simple to install PVC studded floor tile that is easy to keep clean and acts as a dust and noise barrier

# The **Classic Car** Workshop

We understand that everybody has different needs, but to show you how versatile our products can be we have created an example layout for the 'perfect' classic car workshop. This garage interior can easily be added to or adapted to suit your exact requirements to create *your dream garage*.

## Tall Cabinet

The height of this cabinet provides a convenient place to hang overalls and clothing

## Porcelain floor tiles

Hard-wearing tiles, as used in professional workshops. Easy to clean and available in many colours and finishes

## Tool cabinet and top box

A combination of drawer configurations with foam inlays and a locking system to protect your expensive tools

## Louvre peg back panel

Supports storage bins, perfect for the organisation of small components

## Wash up area

Integrated sink, towel dispenser and waste bin ensure a clean and safe working environment

## StoreWall

Flexible wall mounted storage to house both small and bulky items
