# Enjoy the convenience of a home gym

**When you have a busy lifestyle finding time to visit a gym can be a challenge. A home gym allows you to work out at a time convenient to you, whether it's for ten minutes or two hours.**

Our gym garages are designed to provide you storage in a comfortable and motivational environment tailored to your fitness requirements.

High-level wall cabinets are the perfect storage solution for smaller sporting accessories such as tennis balls and clothing, and can be fully integrated with an LCD television screen and entertainment system, so you can watch your favourite shows or music videos during your workout.

Colour coordinated low-level cabinets are the perfect place to store weights whilst a fitted bridging unit provides you space for a mini fridge, ensuring you have hydration at your fingertips.

Due to heavy machines and equipment that may be moved as your collection expands, it is important to choose a hard wearing and durable floor. We recommend PVC tiles as these will also be comfortable and warm when completing floor exercises.

Outdoor exercise equipment can often clutter the garage, so our ultimate home gym is finished with a long run of flexible wall mounted StoreWall. The variety of hooks available means your new wall storage can easily accommodate a plethora of sporting equipment including cycling equipment, golf bags and tennis racquets.

# The Ultimate Home Gym

We understand that everybody has different needs, but to show you how versatile our products can be we have created an example layout for the 'perfect' home gym. This garage interior can easily be added to or adapted to suit your exact requirements to create *your dream garage*.

## PVC Flooring

Easy to install interlocking tiles that create a perfect noise and thermal barrier

## Storage alcove

Colour coordinated bridging unit creates the perfect space for a mini fridge or low level exercise equipment

## Entertainment

Cabinets can be tailored to integrate entertainment systems

## StoreWall

Flexible wall mounted storage to house both small and bulky items
