

AWB-2800

Fully Automatic Wheel Balancer

Product Details & Specifications

Built on the foundation of the AWB-2500, this balancer maximises efficiency in the most demanding of workshops.

Featuring fully automatic data input and laser indication for accurate weight positioning.

An electro-magnetic braking system automatically locks the wheel on imbalance for increased balancing speed.

Optional motor-cycle adaptors are available to compliment the motorcycle balancing programmes.
Led display for easy-to-read data.

Max Rim Diameter: 1"-28"
Max Wheel Diameter: 1118mm
Max Wheel Weight: 70kg
Power Supply: 240v
Balancing Time: 7s
Dimensions: 1550x1160x1243mm
